GLASS INDUSTRIES

Hartung Dallas installs Forel IG line; certified as Guardian SunGuard Select Fabricator

Hartung Glass Industries and Guardian Industries have announced that [Hartung Glass](#) Dallas (Farmer's Branch), Texas is the latest Hartung location to be certified as an independent Guardian Select Fabricator. Hartung Dallas joins Hartung's Seattle, Wilsonville and Sacramento locations as Guardian Select Fabricators offering SunGuard Advanced Architectural Glass Products.

The Guardian SunGuard Select certification and addition of the Forel IG line at Hartung's Farmers Branch location will allow for more product offerings, enhanced service levels and additional local market capabilities throughout Texas, Oklahoma, Arkansas and Louisiana.

"[Guardian SunGuard](#) Select Fabricator certification advances the company's mission of controlled growth and to increase its presence as the leading supplier of fabricated glass products throughout the west and south," stated Bob Cummings, Southwest Regional Sales Manager for Hartung Glass Industries. "The addition of the Forel (Continued on Page 2)

New Forel IG Lines in Dallas and Seattle

Watch the Hartung Dallas Forel IG Line in action

Hartung's Dallas and Seattle locations have also installed new automated Forel Insulating Glass Lines capable of automatically arranging, pressing and sealing double and triple glazed units with precisely calculated Argon gas fills based on the volume of the unit.

The Forel IG line features automatic rotating vertical conveyors to invert the glass lite face in order to position the low-E coating as required facilitating the production of glazing with three or more lites.

insulating glass line further solidifies the company's role in the flat glass market and will increase the value that Hartung delivers to customers."

"Hartung Glass is very proud of our roots in Texas as an active member of the local glass community since 2002. Texas is leading the growth and Guardian SunGuard Select Fabricator certification along with the addition of new equipment will complement our existing lines and enhance our ability to better serve the region with an extremely experienced and talented team and our own fleet of trucks delivering to new and existing customers," said Hartung President & Owner Nick Sciola.

"We are continuously upgrading to provide our customers with more selection and enhanced options for their architectural glass and shower & bath enclosure requirements," added Kurt Carlson, Location Manager for Hartung Dallas. "Hartung has invested significant capital into our Dallas location with leading edge equipment and the Forel line is yet another investment paralleling the 2014 installation of the company's new [Glaston state of the art tempering furnace](#) with air floatation technology which gives Hartung quality, feed and processing results that are impossible to reach with other tempering furnaces. We have made a long term commitment to the market."

"Hartung is currently fabricating Guardian SunGuard [SN68](#), [SN54](#), [SNX 62/27](#) and [SNX 51/23](#) on clear and tinted substrates," said Cummings. "We believe that SNX 51/23 has a home in Texas and is the perfect solution for Zone 1 and Zone 2 of the ASHRAE energy code. We are also excited to be offering triple silver SNX 62/27 which is a very robust product in terms of performance and is popular with architects and developers."

Keller Great Northwest Adventure

High Definition Showers

Holcam representatives (L to R) Don, Rich, Scott, Greg and Ed (not shown) showing off Hartung's HGD Swirl Pattern at the Keller Great Northwest Adventure in Bellevue, WA. Thank you Keller and to everyone who visited our booth!

Located in Wilsonville, Oregon, World of Speed will be a new kind of educational experiential motorsports exposition using historic racecars and motorcycles to tell the story of America's love affair with the automobile and leadership role in world motorsports. It will encompass many aspects of motorsports including drag racing and road racing, land speed racing, motorcycle racing, as well as open wheel and NASCAR.

The attraction will tell the story of local tracks including Jantzen Beach and Portland International Raceway and local racers such as the legendary Indianapolis racecar builder Rolla Vollstedt.

Through interactive exhibits and hands-on activities, World of Speed will offer visitors a behind-the-scenes view of the world of racing. Programming and activities will expose young people to the opportunities available in the auto industry, and to help educate them to enter the workforce or advance to specialized education. For example, Ford Motor Company recently donated a Mustang to World of Speed that will be reconfigured into a hands-on display to showcase how a car is constructed, what materials are used and how materials are recycled. A real Indy car will function as a simulator for fans of all ages, while a car formerly raced by Danica Patrick will have appeal to a wide variety of visitors.

World of Speed will open April 24th, 2015 at 11:00 AM.

Careers at Hartung Glass Industries

Hartung Glass is proud to partner with the finest people in the glass industry.

Hartung Glass Industries has manufacturing and distribution locations throughout the United States and Canada. We offer great benefits, including:

- + Medical, dental, vision insurance
- + Paid holidays and vacations
- + Matching 401K
- + Tuition assistance
- + Opportunities for career advancement

Shower Glass Treatment

AGALITE
GLASS TREATMENT OPTIONS

What is EasyClean™?
EasyClean™ is an ultra-thin transparent coating that permanently bonds to the glass surface and provides protection that will repel both water and oil based stains. It is perfect for shower doors, glass walls & fencing, mirrors, window panes and glass backdrops.

Protection:
EasyClean™ Glass Treatment protects the glass surface from staining, etching or discoloring caused by dirt, grime and soap scum. EasyClean™ repels both water (hydrophobic) and oil (oleophobic) leaving an easy to clean surface with characteristics very similar to a nonstick fry pan. The coating is also completely invisible and does not change the look or feel of the surface.

Glass Protection with a 10 Year Warranty!
Extensive testing has proven EasyClean™ Glass Treatment to last beyond 10 years, enabling a genuine 10-year warranty on all new glass surfaces. EasyClean™ is available in every thickness, texture and tint.

For The Homeowner:

- Keeps glass looking like new (often following proper cleaning instructions)
- Reduces water spots (minerals and mineral deposits)
- Is always easier to clean
- Stays cleaner for longer
- Significantly reduces the growth of bacteria

ShowerGuard by global glass manufacturer Guardian Industries is also available through Agalite and is a very popular choice for shower enclosure protection. ShowerGuard offers a limited lifetime warranty and is available in clear and low iron glass for the Agalite Select and Select Collections in 1/4" (6mm), 3/8" (10mm) and 1/2" (13mm).

Neither product requires a special after-care product to extend the protection.

For more information on glass protection treatment, please see our dedicated Agalite dealer or www.easyclean10.com or www.showerguardglass.com
