

Installation Instructions
Wet Glazing (Silicone) Instructions
New 3/8-in Glass Silicone Glazing Centering Clips
Models starting with: E, EL, SE and DE

P/N MM.3204

**Step
#1**

or

Use “snap vinyl” to secure side panel?
Dry Glazing Instructions --> turn page over

Use silicone to secure side panel?
Wet Glazing Instructions --> read below

**Step
#2**

Introducing the “Centering Clip”- place two of these (SP.2221) in the horizontal and vertical channels (EX.1018) before installing your panels to stabilize and center the 3/8-in glass in the channel.

Note: the clips are not intended to replace the setting blocks. Setting blocks should be used as recommended.

**Step
#3**

Place setting blocks - use setting blocks as recommended.

**Step
#4**

Install Glass Panel and Adjust - the clips help stabilize the glass in place while you silicone.

**Step
#5**

Apply Silicone - the clips create a uniform gap for a superior joint.

or

Use silicone to secure side panel?
Wet Glazing Instructions --> turn page over

Use "snap vinyl" to secure side panel?
Dry Glazing Instructions --> read below

Step #2 **Introducing the "Snap Vinyl"**- Install two setting blocks (BP.3028), or as many as is needed, into each horizontal channel (EX.1018).

Step #3 **Install the glass panel** - into the channels and use two (VN.4031) Snap Vinyl for each channel to stabilize, center and seal the 3/8-in glass in the channel.

Step #4 **Install Snap Vinyl-** First install the inside snap vinyl to full depth. Insert second piece of Snap Vinyl on the outside of the glass. Use a block of wood or similar to set the vinyl all the way in.

NOTES / WARNINGS

Removing Snap Vinyl after installation may damage it. Please remove gently.

Do not use Centering Clips when using Snap Vinyl
